Executive Academic Summary & Connectomic Relevance

Introduces the Automated Anatomical Labeling (AAL) cortical and subcortical parcellation (116 regions). Our study maps all BOLD time-series signals and constructs individualized topological brain graphs across these 116 AAL anatomical regions.

Mathematical & Neurobiological Foundations

- $P = 116$ \text{ anatomical regions of interest (ROIs)}
- \text{Adjacency Matrix } \mathbf{A} \in \mathbb{R}^{116 \times 116}
