

[19] Clinical applications of the functional connectome

Authors: F. Xavier Castellanos, Adriana Di Martino, R. Cameron Craddock, Ashesh D. Mehta, Michael P. Milham

Journal: NeuroImage, vol. 80, pp. 527–540, 2013

DOI: 10.1016/j.neuroimage.2013.04.083

Direct URL: <https://doi.org/10.1016/j.neuroimage.2013.04.083>

Executive Academic Summary & Connectomic Relevance

Reviews resting-state fMRI connectomics across neuropsychiatric conditions (ASD, ADHD, Depression), outlining the vision for individualized functional biomarker discovery.

Mathematical & Neurobiological Foundations

- $$\text{FC}(u, v) = \frac{\sum (x_u(t) - \bar{x}_u)(x_v(t) - \bar{x}_v)}{\sigma_u \sigma_v}$$
