Executive Academic Summary & Connectomic Relevance

Pioneering discovery of the Default Mode Network (DMN) in resting-state fMRI (posterior cingulate cortex, medial prefrontal cortex, and inferior parietal lobes). Our GNNExplainer isolated prominent DMN functional disruptions (Anterior Cingulate to Inferior Temporal).

Mathematical & Neurobiological Foundations

- $\text{DMN Core ROIs} = \{\text{PCC/Precuneus}, \text{mPFC}, \text{IPL}, \text{ACC}\}$
